

Blue Heeler Tanks

Proudly Australian

Best Water Tank Supplier - Southern Queensland

Blue Heeler Tanks is a leading manufacturer and supplier of locally produced water tanks in Southern Queensland. Providing products that meet standards of exceptional quality and are delivered with friendly and professional customer service, Blue Heeler is this year being recognised as the Best Water Tank Supplier of Southern Queensland. We take a closer look at what makes Blue Heeler Tanks the best.

Situated in South East Queensland, Blue Heeler Tanks is a proudly 100% Australian owned and operated manufacturer and distributor of high-quality water tanks for all purposes. Named after the well-known Australian Cattle Dog that has been bred in Australia for generations, Blue Heeler Tanks is a similarly thoroughbred Australian brand that makes tanks with the toughest Australian conditions in mind.

Made using world-class manufacturing and ISO 9001 certified Quality Assurance processes, Blue Heeler tanks are available in virgin, UV-reinforced, food-grade polyethylene and genuine Aquaplate Steel. Both manufactured locally, Blue Heeler ensures that all the materials in its tanks comply with the strict Australian Standard for the safe containment of potable water (AS/NZ 4020).

Providing a complete range of round or slimline poly water tanks, poly water cartage tanks, Aquaplate Steel water tanks, poly septic tanks and water tank pumps, Blue Heeler is able to fulfil every customer need with tanks that are designed to last in even the harshest Australian conditions, in a range of colours and all for affordable prices. Moreover, Blue Heeler is committed to delivering all of its water tanks to customers in Brisbane, Fraser Coast, Gold Coast, Gympie, Ipswich, Lockyer Valley, Logan, Moreton Bay, Redland, Scenic Rim and many more locations across Southern and Northern Queensland for free. It's just part of the Blue Heeler guarantee of superior customer service.

It is a guarantee that every member of the Blue Heeler team is committed to and strives to deliver on every day. From a client's initial contact with the customer service team to the final delivery of their brand-new water tank by the friendly team of transport and logistics professionals, Blue Heeler promises a positive, stress-free experience that lives up to the firm's industry-leading reputation. The team is also able to offer valuable advice and insights on which products work best for which jobs and which clients, whether that be choosing the right tank or water tank pump for their needs. Blue Heeler Tanks has partnered with six of Australia's most trusted water pump brands, including Bianco, Bromic and Hyjet, and as such is able to provide the best possible water pump options.

Blue Heeler's recognition at the Australian Enterprise Awards 2021 as Southern Queensland's Best Water Tank Supplier is therefore well deserved, serving as a testament to the firm's commitment to delivering high quality tanks with exceptionally caring customer service. As it continues to proudly serve the region with the finest in Australian manufacturing, the future looks bright for Blue Heeler Tanks.

Your Blue Heeler Tank is made utilising world-leading manufacturing processes and ISO 9001 certified Quality Assurance practices.

Delivery direct to your property, by our friendly logistics team, is just part of the service at Blue Heeler Tanks. The passion for customer service doesn't stop at the office!
